<sup>&</sup>lt;sup>2</sup> Private lands within Wilderness accessed by cherrystem roads: Since Wilderness boundaries run along both sides of cherrystem roads (and completely encompass private lands accessed by such roads) private parcels attached to cherrystem roads are not considered to be within Wilderness boundaries and are not included in acreage figures for private lands associated with Wilderness, but are included with private lands associated with the NCA.

<u>NOTE</u>: Parcel definition: As used here, a "parcel" refers to a contiguous block of private land not touching any other private lands. The number of parcels has no direct relationship to the number of private landowners, since some owners hold title to more than one parcel and some parcels include subdivided property held by more than one owner.
